SKILLS

Data collection and analysis using various tools.

Facilitate qualitative, quantitative, and mixed method research.

Agile working Persona

Development Interviewing skills

Usability testing

Stake holder management

Present research findings clearly

Promote user-centred design principles and advocate for user needs.

Knowledge of GDS standards and principles

Strong communication skills

Adaptability

PROFILE

An experienced User Researcher with a diverse background, and a proven record of public sector engagement in various departments such as healthcare, social care, DWP and HMRC, I bring a unique perspective to understanding user needs, user journeys and pain points, delivering exceptional user insights that help build great services or products.

With a strong background in quantitative and qualitative research methodologies, GDS, training, mentorship, and Agile, I am equipped to significantly impact any organization seeking to enhance the users' experience of its products or services through data-driven user-centred design.

EMPLOYMENT HISTORY

User Researcher: ONIRSFEM LTD/ THE REDEEMED CHRISTIAN CHURCH OF GOD, OVERCOMERS HOUSE

June 2023 – Present

Conducted user research to understand the needs and experiences of church members, families, and service users. Gathered insights through interviews, surveys, and observation to improve accessibility, inclusivity, and engagement. Partnered with the IT department to test and refine digital tools, including livestreaming, church website, and online giving platforms. Evaluated and supported crèche services to ensure family-friendly, user-focused provision. Provided evidence-based recommendations to leadership, shaping strategic decisions and enhancing the overall church experience.

I work to:

- Understand Congregational Needs & Experiences
  Conduct interviews, surveys, and observation to identify the spiritual, social, and practical needs of church members, families using the crèche, and IT service users, ensuring ministry and services align with real needs.
- Evaluate Accessibility & Inclusivity
  Research how accessible the church's physical spaces, childcare services, and digital platforms are for diverse groups (e.g., parents, elderly, youth, SEND families), and provide evidence-based recommendations for improvements.
- Support Service & Program Design
  Provide insights to guide the design and delivery of church activities, creche programmes, and IT-based services (e.g., livestreams, online giving, websites), making them user-friendly and effective for the congregation.
- Test & Improve Digital Tools
  Collaborate with the IT department to test digital platforms (church website, online sermons, crèche booking systems), ensuring usability and a smooth experience for members and visitors.

- Measure Impact & Feedback Loops
  Establish feedback systems to evaluate church initiatives (worship services, crèche, IT resources), track satisfaction and participation, and provide reports to leadership for strategic planning and continuous improvement.

User Researcher, LA International – Atos – HMRC Remote

April 2023 — May 2023

Completed onboarding and the requirements for working on a DDC account. The project group to which I was assigned was to work on the Making Tax Digital programme. I:

- Familiarised myself with specifics such as the Key Account Operational Information which contained the Partnership SharePoint site, as well as the HMRC Security Operations Procedures (SyOps) among others.

- I worked to understand the HMRC systems and access which included
  - HMRC digital email account (Gmail account)
  - Slack (HMRC Digital)
  - VPN
  - Confluence
  - Jira
  - GitHub
  - Jenkins
  - User Management Portal

User Researcher Consultant, ONIRSFEM LTD. Hybrid

October 2022 — April 2023

- Conducted training and upskilling programs for new entrants to UX, covering topics such as Design thinking, UX fundamental, User Experience Design, User Research, UR methodologies, Usability Testing and Analytics using tools such as Miro, Figma, Excel, Jira, MS Teams, and Slack
- Mentored team members in the application of sound user research techniques (GDS) and industry best practices.
- Organised workshops and interactive sessions to reinforce knowledge and skills.
- Supported new entrants in applying their learnings to real-world projects.
- Monitored progress and provided constructive feedback to help individuals improve their UX capabilities.
- Stayed updated with the latest trends and advancements in UX to ensure training content was relevant and up to date.

User Researcher, FPSG – Scottish GOV (Social Security Scotland) Remote

September 2021 — September 2022

Sample of projects completed.

1. Qualitative Usability Testing of a prototype digital form for client use on a digital portal using a third party application
   August 2022

2. DS&I – Obtaining Supporting Information Using Objective Connect. User Research Usability Testing of a digital portal with a third party application integration
   August 2022

3. Short Term Assistance /Scottish Carers Allowance User Research: Discovery July 2022

4. Discovery user research to understand and capture the user needs, pain points, requirements, perceptions, and expectations of the Client Experience Support Team. July 2022

5. Short Term Assistance for Working-Age Disability Living Allowance. Discovery User Research.
   June 2022

In general, I:

- Conducted research in alignment with Government Digital Service (GDS) standards to gather insights for the development of social services and the rollout of new benefit schemes.
- Collaborated with other members of the UCD team, including facilitating stakeholder interviews, to develop research plans, gather feedback and identify potential users to ensure that the research was user centric.
- Efficiently managed time to deliver quality work within the project's tight deadline.
- Confidently presented research findings to stakeholders, senior management, and other team members to inform decision-making and promote user-centred design.
- Complied with ethical and legal research standards including GDPR and research governance frameworks as per GDS guidelines.

User Researcher, LA International – Capgemini – DWP Remote

February 2022 — March 2022

Main project completed.

1. Digital Portal and Information sharing, storage and reuse. The REPO Project.

   DISCOVERY research

In general, I:

- Conducted quick discovery research in alignment with GDS standards that generated impactful insights.
- Initiated and completed research within the constraints of time and budget.
- Produced data and recommendations for a system wide change in knowledge sharing, reusability of data and information storage, retrieval, and security.

User Researcher, Eplus Services Ltd Hybrid

January 2021 — June 2021

- Led Research activities for government and private clients, from planning to analysis and reporting.
- Conducted remote research studies using methods like usability testing, card sorting, interviews, and surveys.
- Developed accurate research plans, participant profiles and discussion guides to support interdisciplinary research.
- Presented research findings and insights to stakeholders in a clear and concise manner that facilitated in the further development of services.
- Ensured research activities complied to client's business goals and standards whilst also complying with ethical and legal standards.

Technology Consultant, Radian Scientific Hybrid

Users and Equipment research

December 2018 — December 2020

- Gathered data through user interviews to assess suitability of equipment for use by different user groups.
- Gave insights from data analysis to stakeholders to help make informed decisions on equipment procurement.
